

## **REVISION 2:**

### **MPLS Advanced Features 1 initial configuration:**

R11, interface GigabitEthernet4 IP address should be configured as:

```
ip add 10.1.17.11 255.255.255.0
```

This also applies to the EVE-NG export.

### **MPLS Advanced Features 2 initial configuration:**

R11, interface GigabitEthernet4 IP address should be configured as:

```
ip add 10.1.17.11 255.255.255.0
```

This also applies to the EVE-NG export.

## **REVISION 1:**

### **MPLS Advanced Features 1 initial configuration:**

R11, interface GigabitEthernet4 IP address should be configured as:

```
ip add 10.1.17.11 255.255.255.0
```

This also applies to the EVE-NG export.

### **MPLS Advanced Features 2 initial configuration:**

R11, interface GigabitEthernet4 IP address should be configured as:

```
ip add 10.1.17.11 255.255.255.0
```

This also applies to the EVE-NG export.

## **IPv6 Transition Lab 1:**

Page 184. The third to last paragraph should read:

*“Traffic from R12 to routers R9 – R11 must not traverse the link R5 to R6”*

Page 195. The penultimate sentence should read:

*“But the more so, as per the requirement of the lab, traffic from R12 to the 6to4 domain must not traverse the link R5 to R6.”*

This error was corrected in Revision 2.
